

Convergence tests for Marangoni Surfacing paper
($Ma = 1000$, $64 \times 64 \times 128$, $L_r=10$, $L_z=20$, discrete: varying dedalus CFL safety (timestep))

Timestep sweep vs safety = 0.05
($L_r = 10$, $64^2 \times 128$, $Ma = 1000$)

Timestep sweep: trajectories
